

Double Crimping Applicator

Description

Quick-change applicator for crimping terminals in Schaefer crimp machines. If designed accordingly they can also be used with Schaefer stripping modules. This double crimping applicator can process two terminals in one stroke. This type is available for side or for rear feed terminals on a carrier strip.

This applicator is designed with an indexed rotary head for reproducible, independent crimp height adjustment of both the wire and insulation.

Picture shows crimping applicator 31.100.

Range of Application

Schaefer crimping applicators are used in the series production of the cable processing industry.

Examples of use

With the double crimping tool it is easy to produce small and big wire harnesses.
