

Calibration System ES-03

Description

The ES-03 calibration system makes it possible to set the standardized basic machine height of 135,78 mm under a static load of 8,0 kN in the case of crimp machines with longitudinally adjustable connecting rods or lever mechanisms.

The calibration system can also be used for performing machine capability analysis defined by ISO. Here the ES-03 serves as a force measuring system for recording the measurement results from the machine cycles under a dynamic load of 8,0 kN.

The included software calculates and records the evaluation criteria's required by ISO.

The ES-03 can also be used for the calibration of the BB-07i and BB-07P crimp quality monitoring systems.

Sales and Service for Turkey

SAFF Makine Sanayi ve Dis Ticaret Ltd. Sti.

Akcaburgaz Mevkii Alkop Sanayi Sitesi A-6 Blok No:20
